

MONASH University

Secondary Students: Your help is needed

Would you like to contribute to research in parental involvement in mathematics education of their children?

Do you think parental involvement helps you in mathematics education or is it a pressure for children?

As a secondary school student your views are highly valued and could help make a difference.

To participate you only need to be a secondary school student.

You are invited to response to an online survey that would only take 10 - 15 minutes to complete.

In addition, if interested, senior secondary students (Years 10 - 12) can participate in person in an interview 45 - 60 minutes to provide your insights into this research.

Of course you can do the survey without doing the interview.

For students and their parents of 8 families who are willing to participate in an interview, each family will receive a \$50 voucher if selected as participants.

Participation is voluntary and you are free to withdraw at any time. Participants' confidentiality and privacy will be maintained at all times. Your responses are only for research purposes.

This project is approved by the

Department of Education and Early Childhood Development (Project number: 2014_002405)

and

Monash University Human Research Ethics Committee (MUHREC) (Project number: CF14/1306 – 2014000603)

The link to the survey is [**http://tinyurl.com/k2rwxzf**](http://tinyurl.com/k2rwxzf)

Please complete the survey before **31 August, 2014.**

Looking forward to your responses. Thank you.
